

## BAGP Gynaecological Pathology week long course programme 2026

### DAY 1

Monday 21 September

|               |                                                                                          |                                  |
|---------------|------------------------------------------------------------------------------------------|----------------------------------|
| 08:45 – 09:00 | Start the day with BAGP                                                                  | Dr Rupali Arora<br>Dr Sarah Bell |
| 09:00 – 10:00 | Lecture and slide seminar – HPV independent adenocarcinomas of the cervix and precursors | Dr Karen Talia                   |
| 10:00 – 10:50 | Lecture and slide seminar – CIN and squamous carcinomas of the cervix                    | Dr Pinias Mukonoweshuro          |
| 10.50 – 11:20 | <b>COMFORT BREAK</b>                                                                     |                                  |
| 11:20 – 12:10 | Lecture and slide seminar – HPV associated glandular lesions (to cover iSMILE)           | Dr Tony Williams                 |
| 12:10 – 12:50 | Case based lecture on mimics of cervical adenocarcinoma and Silva pattern                | Prof Simona Stolnicu             |
| 12:50 – 13:20 | <b>LUNCH BREAK</b>                                                                       |                                  |
| 13:20 – 14:00 | Lecture – Placental Pathology – diagnoses you do not want to miss                        | Dr William Simmons               |
| 14:00 – 15:00 | Slide seminar – Placental Pathology                                                      | Dr William Simmons               |
| 15:00 – 15:30 | <b>COMFORT BREAK</b>                                                                     |                                  |
| 15:30 – 16:30 | Slide seminar – Potpourri of cases including mesenchymal lesions of the vulva and vagina | Dr Anca Oniscu                   |
| 16:30         | <b>CLOSE</b>                                                                             |                                  |

## Week long course programme 2026

### DAY 2

Tuesday 22 September

|               |                                                                                                                                                                   |                         |
|---------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|
| 08:55 – 09:00 | Start the day with BAGP                                                                                                                                           |                         |
| 09:00 – 09:40 | Lecture – Endometrial hyperplasia                                                                                                                                 | Prof Glenn McCluggage   |
| 09:40 – 10:40 | Slide seminar - Endometrial hyperplasia                                                                                                                           | Prof Glenn McCluggage   |
| 10:40 – 11:10 | COMFORT BREAK                                                                                                                                                     |                         |
| 11:10 – 12:00 | Slide seminar - A practical approach to grading and staging problems in endometrial carcinoma with special reference to synchronous ovary and endometrial tumours | Prof Koen Van de Vijver |
| 12:00 – 12:50 | Case based lecture on mucinous lesions of the endometrium                                                                                                         | Dr Richard Wong         |
| 12:50 – 13:20 | LUNCH                                                                                                                                                             |                         |
| 13:20 – 14:00 | Lecture – Uncommon Endometrial carcinoma                                                                                                                          | Prof Glenn McCluggage   |
| 14:00 – 15:00 | Slide seminar - Uncommon Endometrial carcinoma                                                                                                                    | Prof Glenn McCluggage   |
| 15:00 – 15:30 | COMFORT BREAK                                                                                                                                                     |                         |
| 15:30 – 16:10 | Lecture – Non neoplastic endometrial pathology including proforma reporting                                                                                       | Dr Jason Wong           |
| 16:10 – 17:10 | Slide seminar - Non neoplastic endometrial pathology including polyps                                                                                             | Dr Jason Wong           |
| 17:10         | CLOSE                                                                                                                                                             |                         |

## Week long course programme 2026

### DAY 3

Wednesday 23 September

|                      |                                                                                  |                        |
|----------------------|----------------------------------------------------------------------------------|------------------------|
| <b>08:55 – 09:00</b> | <b>Start the day with BAGP</b>                                                   | <b>Dr Rupali Arora</b> |
| 09:00 – 09:40        | Lecture – Epithelial ovarian tumours                                             | Prof Glenn McCluggage  |
| 09:40 – 10:40        | Slide seminar - Epithelial ovarian tumours                                       | Prof Glenn McCluggage  |
| <b>10:40 – 11:10</b> | <b>COMFORT BREAK</b>                                                             |                        |
| 11:10 – 11:40        | Lecture - Immunohistochemistry in female genital tract                           | Dr Rupali Arora        |
| 11:40 – 12:30        | Lecture and slide seminar – Peritoneal Pathology                                 | Dr Sheeba Syed         |
| <b>12:30 – 13:00</b> | <b>LUNCH</b>                                                                     |                        |
| 13:00 – 13:40        | Lecture - Sex cord stromal tumours and unusual tumours of the ovary              | Prof Glenn McCluggage  |
| 13:40 – 14:40        | Slide seminar - Sex cord stromal tumours and unusual tumours of the ovary        | Prof Glenn McCluggage  |
| <b>14:40 – 15:10</b> | <b>COMFORT BREAK</b>                                                             |                        |
| 15:10 – 15:50        | Lecture – Uterine mesenchymal tumours other than smooth muscle neoplasms         | Dr David Kolin         |
| 15:50 – 16:50        | Slide seminar – Endometrial stromal neoplasms, mixed tumours and unusual tumours | Dr David Kolin         |
| <b>16:50</b>         | <b>Zoom Social</b>                                                               |                        |

## Week long course programme 2026

### DAY 4

Thursday 24 September

|               |                                                                                                |                    |
|---------------|------------------------------------------------------------------------------------------------|--------------------|
| 08:55 – 09:00 | Start the day with BAGP                                                                        | Dr Sarah Bell      |
| 09:00 – 09:30 | Lecture – Non-serous ovarian carcinomas including endometrioid and clear cell carcinomas       | Dr Ayoma Attygalle |
| 09:30 – 10:30 | Slide seminar - Non-serous ovarian carcinomas including endometrioid and clear cell carcinomas | Dr Ayoma Attygalle |
| 10:30 – 11:00 | <b>COMFORT BREAK</b>                                                                           |                    |
| 11:00 – 11:40 | Lecture – Frozen sections                                                                      | Dr Angela Ralte    |
| 11:40 – 12:40 | Slide seminar – Frozen sections                                                                | Dr Angela Ralte    |
| 12:40 – 13:10 | <b>LUNCH</b>                                                                                   |                    |
| 13:10 – 14:10 | Lecture and Slide seminar - Smooth muscle tumours                                              | Dr Kat Vroobel     |
| 14:10 – 15:00 | Lecture – Mucinous ovarian tumours – distinction of primary and secondary tumours              | Dr Sarah Bell      |
| 15:00 – 15:30 | <b>COMFORT BREAK</b>                                                                           |                    |
| 15:30 – 16:30 | Slide seminar – Metastatic and mucinous tumours                                                | Dr Ciarán Ó Riain  |
| 16:30 – 17:00 | Lecture – Molecular pathology – what, where and when                                           | Dr Sarah Bell      |
| 17:00         | <b>CLOSE</b>                                                                                   |                    |

# The British Association of Gynaecological Pathologists

## Week long course programme 2026

### DAY 5

Friday 25 September

|               |                                                                          |                          |
|---------------|--------------------------------------------------------------------------|--------------------------|
| 08:55 – 09:00 | Start the day with BAGP                                                  |                          |
| 09:00 – 10:30 | Lecture and slide seminar– Gestational trophoblastic disease             | Dr Baljeet Kaur          |
| 10:30 – 10:50 | COMFORT BREAK                                                            |                          |
| 10:50 – 12:20 | Lecture and slide seminar– Germ cell tumours                             | Dr Baljeet Kaur          |
| 12:20 – 12:50 | LUNCH                                                                    |                          |
| 12:50 – 13:40 | Lecture – Inflammatory diseases of the vulva                             | Dr Nathan Asher          |
| 13:40 – 14:30 | Lecture – VIN and vulval squamous cell carcinoma classification          | Prof Carlos Parra-Herran |
| 14:30 – 15:00 | COMFORT BREAK                                                            |                          |
| 15:00 – 16:00 | Slide seminar – Vulvar epithelial neoplasms and preneoplastic conditions | Dr William Boyle         |
| 16:00         | CLOSE                                                                    |                          |
